Harneet Kaur

AI/ML Engineer | Agentic AI | GenAI

+91 8018724774 | harneetkaur4464@gmail.com | LinkedIn | GitHub | Portfolio

PROFILE

M.Sc. Data Science graduate with a background in Statistics and 8 months of industry experience at an AI automation platform. Contributed to LLM-based features, voice automation and workflow development. Interested in Agentic AI, Generative AI and building practical AI applications, with academic experience in NLP, machine learning and recommendation systems.

WORK EXPERIENCE

AI Automation Engineering Intern | Incredible Visibility | Mar-Oct 2026

- Documented AI agent triggers and workflow orchestration, including execution validation, credential management and standardised node interfaces.
- Contributed to LLM fine-tuning and automation features, connecting data processing and backend services with Supabase, OpenAI and React interfaces.
- Worked on voice automation workflows for scheduled campaigns, execution tracking and recovery. Fixed workflow validation and guardrail issues and added integration tests.

ACADEMIC PROJECTS

SEHAJ: Multi-Agent Mental Health Chatbot | LangGraph, Llama 3.3, Groq | Dec 2025-May 2026

- Built a LangGraph-based multi-agent system with six specialised agents for intent routing and context-aware task handling.
- Developed a Guardian safety protocol that achieved 90% interception accuracy in high-risk scenarios, with 0% false positives in benign emotional conversations.
- Reduced token overhead by 54.7% and achieved 0.71-second average latency using Groq. Received a CTRS therapeutic validation score of 4.47/5.

Mental Health Text Classification | Transformers, Scikit-learn | Jul-Nov 2025

- Developed an NLP pipeline to classify 51,000+ social media posts across seven mental health categories.
- Evaluated MentalBERT, BioBERT and PubMedBERT, achieving an F1-score of 0.84 with MentalBERT.
- Used emotion-aware preprocessing and deployed the classification pipeline with Streamlit.

Hybrid Product Recommender | Sentence-BERT, SVD | Co-authored | Aug 2024-Oct 2025

- Combined SVD-based collaborative filtering with Sentence-BERT embeddings using an Amazon dataset of 73K reviews.
- Evaluated recommendations using Precision@10, Recall@10 and NDCG@10, achieving approximately 4× the Precision@10 of a review-sentiment-only baseline.

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript, R
- **Technologies:** Agentic AI, Generative AI, Multi-Agent Systems, LLM Applications, LangGraph, LangChain, RAG, LLM Fine-Tuning, OpenAI API, Groq, Machine Learning, Deep Learning, NLP, Transformers, Scikit-learn, Model Evaluation, Text Classification, Supabase, Git, GitHub, Bitbucket, Jupyter Notebook

EDUCATION

- VIT University, Vellore | M.Sc. Data Science | 2024-2026 | **CGPA: 9.46/10**
- BJB Autonomous College, Bhubaneswar | B.Sc. (Hons.) Statistics | 2020-2023 | **CGPA: 9.12/10 (Core CGPA: 9.29),** Department Rank: 2
